

FLOOR LABELS

Warehouse identification, floor marking and safety solutions.

Fortega floor label solutions are developed to perform in the most demanding area of a warehouse. Anything left on the floor is subject to impact damage, and general misuse, so our labels and protectors aim to withstand degrees of reasonable force.

Floor labels range from a consumable self-adhesive flexible plastic to the protective aluminium frame and clear plastic cover which sit over a label. Along with others in between, we have an option to meet budgets and durability needs.

Self-Adhesive:

Our self-adhesive labels are a tough three-part composite plastic construction which is flexible to improve durability while being extremely strong to minimize tearing. These are a cost-effective solution with a unique high strength adhesive. Customers often choose these and order duplicates for high traffic areas.

Aluminium Floor Label Frame:

The protective frames are made from CNC finished, aluminium, with a high-quality finish and accurate measurements. The frames are held in place with screws and provide improved protection against forklift trucks and pallets.

The frames can be supplied complete with a location label that is designed with the relevant references, barcodes and colour coding if needed. The labels are complete with a self-adhesive backing for additional stability.

To complete the label defence, a transparent plastic plate is positioned over the label further shielding it from the elements and impact.

The framed floor label can be self-applied or installed by Fortega.

-  Colour options available.
-  Scratch resistant.
-  Any application temperature.
-  No barcode shrinkage.
-  High strength permanent adhesive.
-  Temporary & permanent attachment.
-  Can be used in freezers.
-  Chemical resistant.
-  Installation services available.
